

The Right Tool at Every Layer

Every enterprise AI stack has four layers. The question isn't which tool to use — it's which layer you're actually buying.

L1

Reasoning & Execution Claude, OpenAI, open-weight models
— the leader changing every 18 months

L2

Enterprise Context Graph Your code, your data, what's allowed, how it connects — the semantic layer unique to the business. Persists when models swap, and Mentor inherits

L3

Platform Services Governance, identity, audit, runtime, policy enforcement — where compliance lives

L4

Outputs Apps, agents, workflows, end-to-end business processes

ANTHROPIC

Anthropic —
builds world-class L1

 outsystems

OutSystems — builds L2 + L3 across the whole enterprise, including the systems Claude operates on.

What OutSystems Ships. What You'd Otherwise Build.

Every capability below is included in the platform —
not a separate tool, not a separate budget line.

High Availability & Auto-Scaling

Multi-AZ failover, automatic. CPU/
RAM auto-scale in real time. RTO 15
min / RPO 1 min with HA enabled.

WAF + Intrusion Detection

CDN-based WAF blocks DDoS, SQLi,
brute force. Anomaly detection alerts
on unknown threats. TLS 1.3 enforced.

Immutable Audit Trail HIPAA/SOX-ready.

HIPAA/SOX-ready. Chronological,
immutable record of all platform
actions. SIEM streaming to Datadog,
Splunk, AWS Firehose.

Deployment Gates

Breaking changes caught at
deploy-time — not in production.
Deployment blocked if downstream
consumers are impacted.

Workflow Engine

Visual BPMN-based workflow
editor. Human + automated
activities, parallel execution, SLA
enforcement, conditional routing.

Observability Streaming

streaming to New Relic, Dynatrace,
Elastic, Splunk, Datadog. Logs,
traces, metrics in near real-time.

Built-in CI/CD

Automated build, quality gates, SAST,
deploy pipeline across Dev → QA →
Production. API-driven for Azure
DevOps / Jenkins.

Secure by Design

OWASP defense-in-depth. Stage
isolation via network namespace.
No direct platform-to-runtime DB
access. Secrets vault enforced.
